Axmint Developments

Axmint is a crypto-mining program on the blockchain that combines mining rigs with cloud mining to create AXM tokens and rewards for miners. These cloud rigs are easily accessible to users through a simple process and a regular payment system.

Axmint aims to simplify crypto, making it accessible and enjoyable for everyone. It's developed by Axmachine Blockchain Services Pvt Ltd, a leading blockchain services provider based in South Africa and the UK, known for its work with companies. Now, they're extending their services to individual users with the Axmint
Powered By: Axmachine

Axmachine, a pioneering force in the crypto mining industry, stands at the forefront of technological innovation, providing cutting-edge mining rig services to empower blockchain projects worldwide. With a relentless commitment to excellence, Axmachine seamlessly integrates state-of-the-art hardware and cloud solutions, ensuring optimal performance and efficiency in cryptocurrency mining.
As a trusted partner for blockchain ventures, Axmachine combines expertise and reliability, offering tailored mining solutions that drive success in the dynamic digital landscape.

Fuelling the future of decentralized technologies, A machine is the go-to choice for businesses seeking robust, secure, and high-performance crypto-mining solutions to unlock the full potential of their blockchain endeavours

Axmachine Developments Offering

Product	Category	Description	Website
Axmint	Mining program	Binary Based Algorithm For Cloud Miners.	www.axmint.io
AXM Token	Minable native token	AXM token is a Minable native token of Axmachine ecosystem with a total supply of 250 million, distributed in 6 different blockchains.	www.axmint.io
AXM Pay	UPI/ Utility portal	AXM pay is a UPI-integrated payment solution app with Utility services working in 8 countries to convert AXM to Fiat.	Google Play
AxGames	Pocket Games	Axmachine is planning to launch multiple games on web3 in support of AxLab blockchain.	In Test Mode
AxLab Experimental Blockchain	The Blockchain	EVM Compatible, POA Consensus Public Blockchain Network with Interoperability, Programmability and Scalability.	www.axmlab.com
AxLab Scan	The Explorer	Track transactions, deploy smart contracts, create tokens, NFT, and get block rewards.	www.axbscan.com

AXB Coin	Network Coin	AXB Coin is a native coin of AxLab with a total supply of 1992000 (19.92M). Used as network fee and block reward payments.	www.axmlab.com
AUSD	Stable Coin	Royalty-based asset to liquidity provider built on AxLab	Coming Soon
Ax Collections	NFT Assets	Multi-chain NFTs you can buy using AXM tokens and sold on respective network NFT marketplaces	Coming Soon
AxWallet	Crypto Wallet (Hot Wallet)	Custodial Web3 wallet for Ax Chain Network and all multiple Blockchain tokens storage and browsing.	Coming Soon
AxCoin Exchange	Crypto Exchange	Secure Crypto exchange with a multi-asset trading platform.	Coming Soon
AXB Earn	Earning platform to the liquidity provider	Liquidity-providing users can earn AXB coins on performing assigned tasks. Provide help, Get help program offered.	Coming Soon
Ax Host	Blockchain Cloud Servers	Files storage and Dapps hosting	Coming Soon

Axmint: The Crypto Mining Program

A blockchain-based platform offering innovative and friendly crypto mining, fostering community pool earning and cloud crypto mining advancement in the crypto space. The program rewards mining rig holders with AXM token and USDT in referral rewards.

AXM Token: Minable Native Token

The native cryptocurrency powering the Axmint ecosystem, facilitating transactions, governance, and incentivizing user participation across various decentralized services and products. Built on multiple blockchains like BSC, SOL, Polygon, Avalanche, Arbitrum, and Axlab.

The token is a minable token that will have its last token mined by 2071.

- 70% BEP 20 (10,000 Minted per day)
- 10% on AxLab Blockchain
- 7% on Solana Blockchain
- 5% on Avalanche Blockchain
- 5% on Polygon Blockchain
- 3% on Arbitrum Blockchain

AXM Pay: Crypto to Fiat Payments

Seamlessly integrated with UPI, AXM Pay provides utility services, enabling users to make secure and efficient transactions, and enhancing accessibility and convenience in the digital payment landscape. Loaded with all real-time user support and available in countries like India, Sri Lanka, Mauritius, Bhutan, Oman, Nepal, France, and UAE.

Live on Play store : AXMPAY

AXM Debit Card

Empowering users with the flexibility to utilize their AXM holdings for everyday transactions, bridging the gap between traditional finance and the decentralized world.

AXM Play: Pocket-friendly Games

A suite of 300+ engaging games leveraging blockchain technology, offering users entertainment while earning rewards through AXM token participation.

AxLab Experimental Blockchain: Blockchain for Everyone

Operating on a Proof of Authority (PoA) consensus mechanism, AxLab Blockchain empowers developers with features like 50% royalty and gas fee returns, fostering innovation in decentralized applications. The blockchain supports multiple ledger contracts like ZkSync, Solana, BSc, Ethereum, Optimism, Atom, and Arbitrum. Including all layer 1 and layer 2 chains.

Axbscan Explorer: 176000 TPS

This is the world's fastest blockchain providing insights into the AxLab Blockchain and other blockchains too. Explorer offers transparency and visibility into transactions, smart contracts, and network activity, enabling users to explore the ecosystem with ease.

Each smart contract deployer of the AxLab blockchain is rewarded with a 50% fee as a block reward. This is the World's first blockchain to offer rewards to the deployers.

Transaction time and fee

3 Gwei (Standard: 15-30 sec)
3 Gwei (Fast : 5-15 Sec)
3 Gwei (Standard: 3-6 Sec)
Gas Fee : 0.000063 AXB

AXB Trial Coin: The Network Currency

With a defined supply, AxLab facilitates development fees, and NFT purchases and offers features like Fiat conversion, enhancing accessibility and utility within the Axmint ecosystem.

Ax Build: NFT and Smart Contract Development

Ax Build is a development library for developers to build smart contracts and NFTs with ease. The NFT program is advanced to support the creation of NFTs on different blockchains using the AXM token of that network.

The NFT launchpad program will enforce listing assets with 10X price of the respective network marketplace.

Stable Coin (AUSD): Reserve your funds.

Offering stability and staking rewards, AUSD provides users with a reliable digital asset for transactions and investment opportunities within the Axmint platform.

Ax Collection: Axmint Unique Collections

Leveraging the AXM token, Ax Collection offers users the opportunity to access high-return NFTs across different blockchains, diversifying investment portfolios and fostering digital asset ownership.

AxWallet: Store and Browse

A centralized wallet solution providing users with secure storage and management of their digital assets within the Axmint ecosystem, enhancing accessibility and usability.

AX Exchange: Crypto Exchange

Providing trade liquidity and a seamless trading experience, AX Exchange facilitates the exchange of digital assets, fostering a vibrant ecosystem for users to participate in the crypto market.

AXB Earning: Liquidity Rewards

AxLabs incentivizes the liquidity provider with interesting rewards for performing minimal tasks. Additional a provide help and give help option will be offered.

Ax Host: Domains.axb

Leveraging AXB Coin, Ax Host offers ANS services, providing users with decentralized domain management solutions and enhancing the accessibility and decentralization of the Internet.
